

Watch Stand

Installation Guide

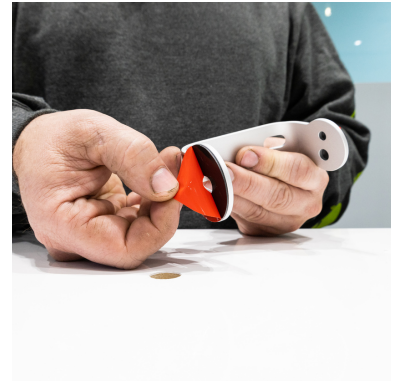

Step-by-Step Instructions:

STEP 01

Clean fixture surface with alcohol wipe. Allow to dry thoroughly.

STEP 02

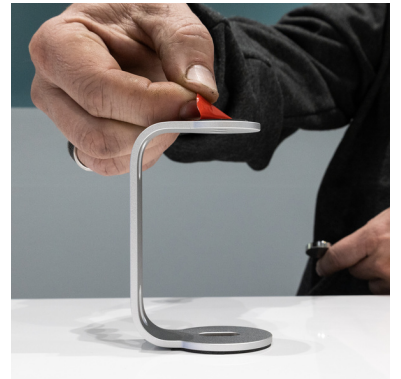

Peel red liner from bottom VHB surface of stand. The bottom can be identified since it is much larger VHB than the top.

STEP 03

Place stand onto fixture. Apply pressure to VHB for 10 seconds. Apply pressure to the edges and center of stand to ensure full adhesion. The angled top surface should be oriented towards the front of the fixture.

STEP 04

Peel red liner from top VHB.

Step-by-Step Instructions:

STEP 05

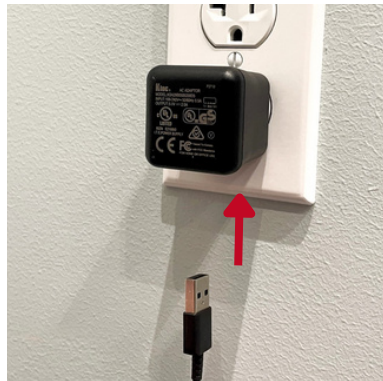

Place watch charger puck onto VHB, with power cable facing the side of the stand.

STEP 06

Route power cable down through holes in stand. It can be routed out the back or down through your fixture.

STEP 07

Plug watch charger into power brick and then into power outlet.

STEP 08

Set merchandised watch onto stand.

STEP 09

Connect Watch Sensor Cable to corresponding CX Flex or Core II Alarm Module.
