

Installation Instructions

1. Align the circle opening at the bottom of the base with the press button. Press the button to release the top.

2. Remove wingnuts. Align the studs with the holes in the fixture. Tighten the wingnuts on all sides.

3. Flip over the laptop. Ensure that the legs of the bracket are fully extended using the press buttons.

4. Press the two corner legs into the crease of the laptop, so they are nice and snug against the device. Tighten the legs.

5. To install into the base, insert the top notch first.

6. Press down in the middle to ensure the laptop is secure.
