KEY SETS (SOLD SEPARATELY)

GLASS DOOR LOCKS[™] PRODUCT MANUAL

KEY REGISTRATION (Non-Connect) - Complete ALL programming before installing

DELETING KEYS (Non-Connect Mode Only)

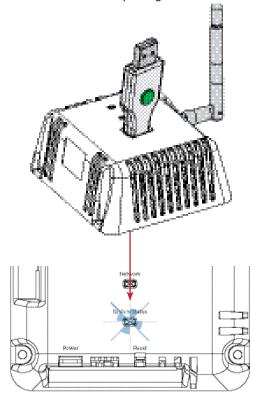

2 After 10 seconds you will hear a double beep, and the whitelist will be cleared. Lock automatically enters key enrollment mode. At least one Versa User Key needs to be added successfully. If no User Key is added during enrollment mode, authorization card will be deleted and lock will return to default mode.

CONNECT SETUP

 Insert MTI Connect[®] IntelliKey[™] into Connect Hub for 10 seconds. This will enter pairing mode for 15 minutes.

PAIRING VERSA EX

1

Place Pairing Card over the RFID icon to place Versa EX in pairing mode. LED will be flashing blue.

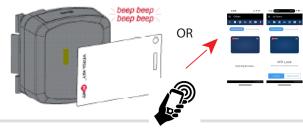

2 Swipe Pairing card to lock. Lock will start slowly beeping confirming it is looking for Connect network. Upon successfully pairing the lock will emit a double beep. Lock will automatically download key whitelist from network.

3 Using Glass Door Lock:

Place the User Card on the lock, or open mobile application on phone and tap phone to the lock. Once the phone detects the lock, mobile app will present UNLOCK button. Touch button to unlock. Lock will emit a single beep immediately followed by a double beep. Once you hear the motor click, slide glass doors open. Slide the glass doors closed. Lock will beep when locked.

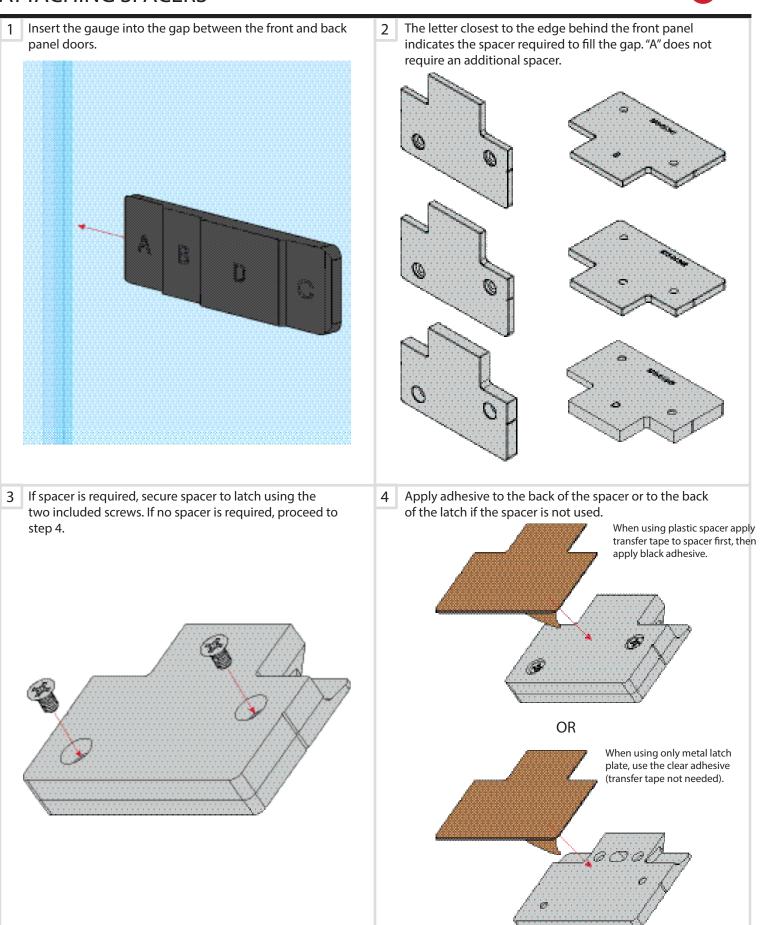

2 Swipe Pairing card to lock. Lock will start slowly beeping confirming it is looking for Versa EX network. Upon successfully pairing the lock will emit a double beep. Lock will automatically download key whitelist from Versa EX.

Full Versa EX programming can be found in guide 063-00393

FCC ID: 2AA2X-15000118V2

Model: Bluetooth Glass Door Lock FCC STATEMENT

This device complies with Part 15 of the FCC Rules.

Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.

Caution: If any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The grantee is not responsible for any changes or modifications not expressly approved by the party responsible for compliance. Such modifications could void the user's authority to operate the equipment.

This transmitter must not be co-located or operating in construction with any other antenna or transmitter. This equipment should be installed and operated with a minimum distance of 20 centimeters between the radiator and your body.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

- Consult the dealer or an experienced radio/TV technician for help.

IC: 24439-15000118V2

Model: Bluetooth Glass Door Lock

ISED Statement

This device contains licence-exempt transmitter(s)/receiver(s) that comply with Innovation, Science and Economic Development Canada's licence-exempt RSS(s). Operation is subject to the following two conditions:

(1) This device may not cause interference.

(2) This device must accept any interference, including interference that may cause undesired operation of the device.

L'émetteur/récepteur exempt de licence contenu dans le présent appareil est conforme aux CNR d'Innovation, Sciences et Développement économique Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes :

1) L'appareil ne doit pas produire de brouillage;

2) L'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

CAN ICES-3(B)/NMB-3(B)

The device meets the exemption from the routine evaluation limits in section 5 of RSS 102 and compliance with RSS-102 RF exposure, users can obtain Canadian information on RF exposure and compliance.

Le dispositif rencontre l'exemption des limites courantes d'évaluation dans la section 5 de RSS 102 et la conformité à l'exposition de RSS-102 rf, utilisateurs peut obtenir l'information canadienne sur l'exposition et la conformité de rf.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter. This equipment should be installed and operated with a minimum distance of 20 centimeters between the radiator and your body.

Cet émetteur ne doit pas être Co-placé ou ne fonctionnant en même temps qu'aucune autre antenne ou émetteur. Cet équipement devrait être installé et actionné avec une distance minimum de 20 centimètres entre le radiateur et votre corps.

Technical Data

Operating frequency $\ 125 \text{KHz}$, 2.4 GHz : 2402 - 2408 MHz

Operating temperature: 0° C to 40° C

Max power : 125KHz <42dBuA/m at 10m, 2.4GHz < 20 dBm
