Versa EX™

CX Flex 1A, 1P, 1P+

Micro II

CX Flex 4A, 4P

MTI Locks

Freedom Focus

RFID KEYS

Versa Key™ Authorization Card

Used in "standard" mode, or with Versa EX for key whitelist programming.

One Authorization card per store. Products are not capable of having two Authorization cards. This card should be saved in a safe place for adding new keys, new positions, or removing keys

Versa Key™ User Card

User key for performing day to day store operations such as arming, disarming, or alarm silencing.

Can be used in "Standard" or "Network" mode. Stores may have a few per store, a few per department, or assign one to each user, which is especially important in a Managed Access environment. Available as Key Cards, or Key FOBs.

Versa Key™ Network Pairing Card

Used to place security positions or Versa EX into Network Pairing Mode

This key is not unique, so you can have as many of these in your store as you want. It is simply to trigger the position to enter the network pairing mode

1 Place Authorization Card over the RFID icon to register to system. LED will turn solid blue. Locks will double Beep

System must be disarmed to perform this operation.

2 Place the User Key over the RFID icon to add.

If successful → unit beeps 2 times
If unsuccessful → unit beeps 4 times (retry)

Repeat process for all User Keys until they are successfully added.

3 To close the whitelist mode, place the Authorization Card over the RFID icon. Whitelist mode will end automatically after 3 minutes of no use. LED will double flash yellow every 8 seconds on initial setup, indicating no positions are paired to Versa EX.

ARM/DISARM

1 Place Versa User Card or Versa FOB over position momentarily to arm, or disarm.

Disarm → unit beeps 2 times, LED flashes white
Arm → unit beeps 2 times, LED goes solid white

ADDING NEW USER KEYS

1 From an armed state, place the user key over the RFID icon to disarm the system. LED will be flashing white.

2 Place Authorization Card over the RFID icon. Follow Key Whitelist process at the top of this page.

- 1 To silence an alarm, tap the user card over the RFID icon. This will silence alarm on position. The position will continue to flash red/white LED's until the card is swiped again. For locks, a single card swipe will silence door open alarm.

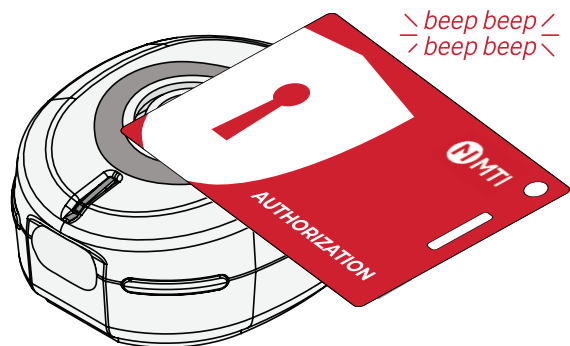

If it can arm → unit beeps 2 times, LED goes solid white

If it cannot arm → unit beeps 2 times, then four fast beeps, LED flashes white every 8 seconds

REPLACING AUTHORIZATION CARD

- 1 When programming in a new authorization card, tap and hold new Authorization card to device for 10 seconds. New card will beep 4 times fast initially.

- 2 After 10 seconds, position will start ticking for 10 seconds, and then alarming for 1 minute, with a double beep confirming success at the end.

Alarm can be silenced by swiping any authorized Versa User Key

DELETING WHITELIST (This will delete all User Keys from the system.)

1 From an Armed state, place the User Key over the RFID icon to disarm the system. LED will be flashing white.

2 Hold down the Authorization Card for 10 seconds, LED will be solid blue.

3 Place the Authorization Card over the RFID icon AGAIN while LED is blue.

If successful → unit beeps 2 times and LED double flashes white every 8 seconds
If unsuccessful → unit beeps 4 times (retry)

REMOVE INDIVIDUAL KEYS FROM WHITELIST

1 From an Armed state, place the User Key over the RFID icon to disarm the system. LED will be flashing white.

2 Place Authorization Card over the RFID icon to enter programming mode. LED will be solid blue.

3 Hold down User Key to be removed for 10 seconds. Key will double beep immediately and then double beep confirming successful removal of key.

beep
beep

4 Place Authorization card over the RFID icon to exit programming mode, or it will time out automatically after 3 minutes.

- 1 Enter network mode by first placing the Connect Hub or Versa EX into pairing mode.

For Connect Hub, insert Intellikey into hub, after 10 seconds, status LED will flash blue after 10 seconds.
 For Versa EX, swipe Pairing card, LED's will flash blue

Connect Hub

OR

Versa EX

- 2 Tap pairing card against security device. Upon successfully entering pairing mode you will hear a double beep, and LED's will turn blue. Locks will only emit a double beep. Upon successful pairing, device will emit another double beep

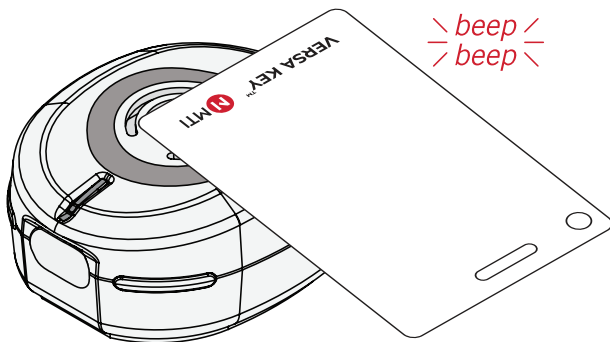

OR

CONVERTING TO STANDARD MODE (Removing Connect or Versa EX)

- 1 Disarm device with Versa user key. For locks, they must be in an un-latched state to initiate conversion mode.

- 2 Tap and hold auth card against device for 10 seconds. LED will be Solid Blue

Add new user keys per workflow on page 3.

After 180 seconds if no new user keys are added, system will time out and revert to network mode.

CONVERTING TO NETWORK MODE (Converting to Connect or Versa EX from Standard Mode)

- 1** Enter network mode by first placing the Connect Hub or Versa EX into pairing mode.

For Connect Hub, insert Intellikey into hub, after 10 seconds, status LED will flash blue after 10 seconds.
For Versa EX, swipe Pairing card, LED's will flash blue

OR

Connect Hub

Versa EX

- 2** Disarm position with current user key. Key will double beep

- 3** Tap and hold for 10 seconds pairing card against security device. Upon successfully entering pairing mode you will hear a double beep, and LED's will turn blue. Locks will only emit a double beep. Upon successful pairing, device will emit another double beep
